

Anish Paramsothy

Mechatronics Engineering

(289)-404-9194 | paramanish11@gmail.com | <https://www.linkedin.com/in/anish-paramsothy/> | [anishparamsothy.portfolio](https://anishparamsothy.github.io/Portfolio/)

EDUCATION

McMaster University

Sept. 2020 – Apr. 2026

Bachelors of Engineering (B.Eng), Mechatronics Engineering Co-op (GPA:3.6/4.0)

Hamilton, ON

- *Relevant Coursework:* CAD/CAM/CAE; Fluid Mechanics and Heat Transfer, Mechanical Behaviour of Materials, Thermal Systems Design; Engineering Mechanics; Embedded Systems Design; Control Systems

EXPERIENCE

Project Engineer

Jan. 2024 – Aug. 2024

Ferrero Canada Ltd.

Brantford, ON

- Utilized AutoCAD to modify layout files to draft new concepts for production lines in order to utilize space more effectively and direct traffic flow of workers to a concentrated area; maintained the layout drawings of the facility to match the current state of the buildings, while adhering to company design standards
- Assisted in the startup and planning of various projects within the facility including the installation of new production lines; drafted scopes of work and collaborated with contractors to remove old machinery and piping while replacing with new equipment
- Worked alongside finance team to track unused machinery within the facility and communicated with vendors to work towards selling \$50,000 of assets

CAD Design Technologist

Sept. 2023 – Dec. 2023

S&C Electric Company Ltd.

Etobicoke, ON

- Reviewed and updated plant layout drawings using MicroStation while adhering to design standards
- Utilized CMMS software Limble to apply 5S lean manufacturing practices to manage and revitalize stock and storage rooms, transforming the unusable space to a managed and well-organized room to allow for easy access of materials to increase work flow of maintenance staff

PROJECTS

OpenArcade Game Controller | Autodesk Inventor, KiCAD

Sept. 2025 – April 2026

- Designed a modular, box-style game controller with attachable modules that can be configured to meet individual user needs, with an emphasis on gaming accessibility
- Applied Design for Manufacture and Assembly (DFMA) to the controller housing by developing a standardized, repeatable enclosure system to support easy fabrication and future module expansion
- Utilized additive manufacturing (3D printing) with a key focus on optimizing design by limiting PLA usage and minimizing print time
- Developed electrical schematics and physical wiring layouts for the controller system

Inline 4-Cylinder Toy Engine Design | Autodesk Inventor, Autodesk Fusion 360

Jun. 2025 – Jul. 2025

- Research, design and development of a 4-stroke, 4-cylinder engine that effectively simulates the underlying mechanisms of the internal combustion engine
- Detailed engineering drawings created to showcase all components including exploded view, with feasible manufacturability in mind
- Additive manufacturing simulations (CAM) completed in Autodesk Fusion 360 to determine build time for complex parts of design

Remote-Controlled Vehicle Design | Autodesk Inventor, Autodesk Fusion 360

Jan. 2025 – Apr. 2025

- Developed a manufacturable assembly design of a FWD remote-controlled vehicle including stepper motor located in the middle of the vehicle and gear train, through an iterative design process with key considerations such as use of worm gears to prevent driving of the vehicle outside of the motor
- Performed finite element analysis (FEA) to plan future optimizations on potential critical points, such as reducing material usage in the base in trade for increasing the material usage in the axles of the vehicle (CAE)
- Utilized Fusion 360 to develop an additive manufacturing (CAM) layout to assess print time and overall feasibility of design

TECHNICAL SKILLS

CAD/CAM/CAE: SolidWorks, Inventor, ANSYS, KiCAD, Fusion 360, AutoCAD, MicroStation, SketchUp, OnShape

Software/Hardware: C, Verilog, C++, Assembly, Python, MATLAB, Arduino, Raspberry Pi, STM32, DE1-SoC

Other: Microsoft Office Suite (Excel, Project, PowerPoint), 3D printing, Multisim, Maple, Digital art
