

Anish Paramsothy

Mechatronics Engineering
Oshawa, ON | Open to Relocation

(289)-404-9194 | paramanish11@gmail.com | <https://www.linkedin.com/in/anish-paramsothy/> | anishparamsothy.portfolio

Education

McMaster University

Sept. 2020 – Apr. 2026

Bachelors of Engineering (B.Eng), Mechatronics Engineering Co-op (GPA:3.7/4.0)

Hamilton, ON

- *Relevant Coursework:* CAD/CAM/CAE; Fluid Mechanics and Heat Transfer; Mechanical Behaviour of Materials; Thermal Systems Design; Engineering Mechanics; Embedded Systems Design; Control Systems

Experience

Project Engineer | Ferrero Canada Ltd.

Jan. 2024 – Aug. 2024

- Maintained and updated facility layout drawings in AutoCAD by performing basic survey work of the current building state, applying prescribed techniques to ensure strict adherence to company design standards
- Assisted in the startup and planning of various projects within the facility including the installation of a new production line, increasing production output by 30%
- Actively observed construction activities and collaborated with contractors during the removal of old piping and the installation of new industrial equipment
- Worked alongside finance team to track unused machinery within the facility and communicated with vendors to work towards selling \$50,000 of assets

CAD Design Technologist | S&C Electric Canada Ltd.

Sept. 2023 – Dec. 2023

- Reviewed and updated plant layout drawings using MicroStation while adhering to design standards
- Spearheaded a 5S lean manufacturing initiative to revitalize stock and storage rooms, utilizing Limble CMMS to establish visual management tools and standardized organization, cutting out hours of time spent searching for specific parts

Projects

OpenArcade Game Controller | Capstone, Autodesk Inventor, KiCAD

Sept. 2025 – April 2026

- Design and fabrication of a modular, box-style game controller with attachable modules that can be configured to meet individual user needs, with an emphasis on gaming accessibility and user customization
- Created BOM and Applied Design for Manufacture and Assembly (DFMA) to the controller housing by developing a standardized, repeatable enclosure system that streamlines fabrication and future module expansion via threaded inserts and snap-fit joints, while also focussing on minimizing unique part count
- Utilized additive manufacturing (3D printing) with a key focus on optimizing design by limiting PLA usage and minimizing print time, while ensuring precision and accuracy in the design
- Developed electrical schematics and physical wiring layouts for the system

Inline 4-Cylinder Toy Engine Design | Personal, Autodesk Inventor, Autodesk Fusion 360

Jun. 2025 – Jul. 2025

- Research, design and development of a 4-stroke, 4-cylinder engine that effectively simulates the underlying mechanisms of the internal combustion engine, with detailed engineering drawings created to showcase all components including exploded view
- Additive manufacturing simulations (CAM) completed in Autodesk Fusion 360 to determine build time for complex parts of design

Remote-Controlled Vehicle Design | Personal, Autodesk Inventor, Autodesk Fusion 360

Jan. 2025 – Apr. 2025

- Developed a manufacturable assembly design of a FWD remote-controlled vehicle including stepper motor located in the middle of the vehicle and gear train, through an iterative design process with key considerations such as use of worm gears to prevent driving of the vehicle outside of the motor
- Performed finite element analysis (FEA) to plan future optimizations such as reallocating material density from low-stress base areas to high-stress critical points, achieving a more favorable strength-to-weight ratio
- Utilized Fusion 360 to develop an additive manufacturing (CAM) layout to assess print time and overall feasibility of design

Technical Skills

CAD/CAM/CAE: SolidWorks, Inventor, ANSYS, KiCAD, Fusion 360, AutoCAD, MicroStation, SketchUp, OnShape

Software/Hardware: C, Verilog, C++, Assembly, Python, MATLAB, Arduino, Raspberry Pi, STM32, DE1-SoC

Other: Microsoft Office Suite (Excel, Project, PowerPoint), 3D printing, Multisim, Maple, Digital art
